

AMCAD's eCOMMERCE

GOVERNMENT ONLINE

ACCEPT ELECTRONIC PAYMENTS WITH eCOMMERCE.

AMCAD provides a city or county the ability to accept monies from business and citizens - in the form of all major credit or debit cards - for all government services, over the Internet or across the counter. eCommerce delivers ease of access and improves timeliness of government to business and government to citizen services while maintaining a high degree of information security for data confidentiality and integrity.

ENHANCE ACCESSIBILITY AND QUALITY OF SERVICE.

Electronic filing of court documents, accessing government records, applying for licenses and depositing funds into a jail inmates trust account are just a few of the common services provided by city and county governments. Enabling these services with an eCommerce solution significantly improves the quality of service while creating value to the government and constituent.

A NO RISK SOLUTION.

Customers' and constituents' financial data is stored with the highest standards of security. The information is used solely for transactional purposes to maintain the integrity of the business transaction. Adopting PCI standards and a highly secure and redundant hosting environment, we eliminate the loss of critical business data. AMCAD's eCommerce solution delivers a powerful enabler for improved government services.
